JUNE 2007

HIGH TECH

Shooters Ridge

The Gun Grip Vise is great for sighting in or firearm maintenance. Adjustable front and rear clamps accommodate most rifles or shotguns. Plus, the clamps have protective padding to prevent marring and scratching of your firearm. The rear foot is adjustable for precise elevation adjustment. Lightweight and portable, the Gun Grip Shooting Vise works well at a range, at home or in the field. www.shootersridge.com.

Alaskan Guide Flashlights

Cabela's Alaskan Guide flashlights are two lighting sources in one. With the push of a button, they switch between the benefits of long-lasting LEDs and the extra brightness of a 50-lumen xenon lamp. The 2-in-1 pre-focused aluminum reflector intensifies the brightness of the light beam, creating more useful light at longer distances. Alaskan Guide flashlights include a nylon sheath with battery holder and two CR123A batteries, which offer 50 hours in LED mode and one hour in xenon mode. www.cabelas.com.

Smart Scouter

The Smart Scouter trail cameras snap photos based on movement, then wirelessly send the photos to your account at www.smartscouter.com. You can retrieve your photos from any computer or cell phone in real time, without having to visit the camera every time you want to check the photos — saving you time and money and keeping your human scent out of your hunting area. (888) 70-SCOUT, www.smartscouter.com.

SMART SCOUTER IS CHANGING THE WAY YOU SCOUT FOREVER

Wirelessly send trail camera photos to you anywhere in the world

No more disruption or scent to hunting area just to check trail cameras

Save time and money by not traveling just to check trail cameras

Works as non-wireless trail camera in areas with no cell coverage

Simple and easy to use

50' Infrared flash eliminates spooking of game

Long lasting battery life

Fast trigger speed
